Re: Cool Creek Drain – Greyhound Pass Maintenance Assessment Area

Attached is a drain map, drainage shed map and schedule of assessments for maintenance for Cool Creek Drain. This portion of the drain is located in Clay and Washington Townships from south of 151st Street to downstream of Keystone Parkway.

This portion of the Cool Creek Drain consists of several existing Regulated Drains. These drains are the Bridlewood Section 1, 3, and 4 Arms and the Keystone Extension of Cool Creek. The Bridlewood Section 1 Arm was established per my report dated June, 3, 1988 and approved by the Board at a hearing on September 12, 1988 (see Hamilton County Drainage Board Minutes Book 2, Pages 284 and 296). The Bridlewood Section 3 Arm was established per my report dated August 31, 1990 and approved by the Board at a hearing on November 19, 1990 (see Hamilton County Drainage Board Minutes Book 2, Page 476). The Bridlewood Section 4 Arm was established per my report dated October 16, 1992 and approved by the Board at a hearing on December 21, 1992 (see Hamilton County Drainage Board Minutes Book 3, Pages 59 and 67). The Bridlewood Drain was made an arm to Cool Creek per my report dated January 14, 2005, heard by the Board at a hearing on April 25, 2005 (see Hamilton County Drainage Board Minutes Book 8, Pages 277 to 278) and approved by the Board on September 25, 2006 (see Hamilton County Drainage Board Minutes Book 9, Pages 460 to 461). The Keystone Extension was established per my report dated March 21, 2008 and approved by the Board at a hearing on May 27, 2008 (see Hamilton County Drainage Board Minutes Book 11, Pages 168 to 170). This consists of 3,420 feet of open ditch to be maintained.

At this time Cool Creek Drain is listed on the proposed 2012 Classification List for reconstruction at number 9. The drain was requested for classification by Paul Wheeler on January 15, 1971, Bruce O. Buts on June 7, 1979 and J. Donald Day on May 9, 2005. The office has had twenty (20) complaints on the drain since 2002. Those are as follows:

Although this drain is on the reconstruction list, I recommend that this portion be placed on maintenance. The upper portion of the drain was reconstructed in 2007 – 2008 per my report dated April 9, 2007 and approved at hearing on July 9, 2007 (see Hamilton County Drainage Board Minutes Book 10, pages 345 – 350). Any additional portions of the drain needing reconstruction should be petitioned for in the future.

The nature of maintenance work required is as follows:

1. Clearing of trees and brush on the existing open drain as needed to improve flow;
2. Creation and re-excavation of silt basins;
3. Re-excavation of open ditch to original grade line;

4. Surface water structure as might be required;
5. Bank erosion protection and/or seeding as might be required;
6. Repair of private tile outlet ends as might be required;
7. Repair of regulated drain tile outlets;
8. Removal of beaver dams;
9. Removal of debris and/or blockage from regulated open ditch;
10. Cleaning and/or repair of existing catch basin as might be required;
11. Spraying for vegetation control;
12. Mowing filter strips;
13. Any other repairs deemed to be applicable and necessary by the Surveyor to restore the drain to its original intended use and condition.

The frequency with which maintenance work should be performed is annually as required by the original condition of the drain.

A Watershed Management Plan was prepared by Clark Dietz Engineers in 2003. The plan was updated through a 319 Grant in 2005. This report provided recommendations to the Drainage Board for maintenance, reconstruction and flood control.

I have reviewed the plans and drain map and believe, as set out in IC 36-9-27-69(b) (1) that all tracts within the drainage shed of the Cool Creek Drain will benefit. The following maintenance assessment has been adopted by the Board:

1. Maintenance assessment for roads and streets be set at \$10.00 per acre with a \$25.00 minimum.
2. Maintenance assessment for agricultural tracts be set at \$2.00 per acre with a \$15.00 minimum.
3. Maintenance assessment for non-platted residential tracts be set at \$2.00 per acre with a \$15.00 minimum.
4. Maintenance assessment for commercial, institutional and multi-family residential tracts to be set at \$35.00 per acre with a \$75.00 minimum.
5. Maintenance assessment for platted lots in subdivisions whose drainage systems will not be part of the regulated drain (those systems maintained by the City of Westfield) shall be set at \$25.00 per lot - \$25.00 minimum. Commons areas within subdivisions whose drainage systems will not be part of the regulated drain (those systems maintained by the City of Westfield) shall be set at \$10.00 per acre with a \$25.00 minimum.

6. Maintenance assessment for platted lots within subdivisions whose drainage system will be part of the regulated drain shall be set at \$15.00 per acre with a \$65.00 minimum. Common areas within regulated drain subdivisions shall be set at \$15.00 per acre with a \$65.00 minimum.

The annual maintenance collection for this extension will be \$17,122.12.

This drain has been classified as an urban drain under IC 36-9-27-67 per my report dated April 9, 2007.

Cool Creek has been identified in the NPDES Phase II General Permit Application, Storm Water Quality Management Plan Part C: Program Implementation Report, page 3, as a MS4 area receiving stream.

Cool Creek is listed in the NPDES Phase II General Permit Application Storm Water Quality Management Plan Part B: Baseline Characterization Report on the following pages:

Page 3 as an MS4 Area Receiving Stream

Page 6 as #05120201090030 Watershed within the MS4 Area

Page 14 as being in the IDEM 305(b) Report as being fully supportive of aquatic life and full body contact

Page 16 as not substantially impacted by MS4 storm water discharges

Page 30 as a USFW Survey of fish communities and habitat qualities priority stream

Page 31 as a priority stream

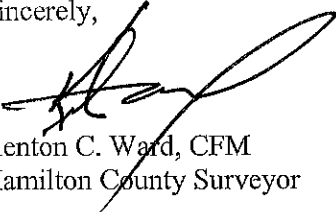

Page 50 as a priority stream

This drain is listed on the 2008 303(d) list of impaired waters for Indiana. The parameter of concern is E.Coli.

Currently the open ditch is heavily overgrown and is in need of clearing. The drain is susceptible to jams caused by debris which causes backwater and localized flooding. It is possible for large woody debris to collect on road crossings. This creates a threat to the bridge structure and can redirect flow causing erosion. This drain has had a large beaver population.

I recommend that the Board set a hearing for this proposed maintenance for July 23, 2012.

Sincerely,

Kenton C. Ward, CFM
Hamilton County Surveyor
